

**WARNING**

# VECTOTHOR™ FLY BAIT

## COMPOSITION:

Active ingredients:.....5 g/kg IMIDACLOPRID  
.....1 g/kg (Z)-9-TRICOSENE  
Inert Ingredients:.....994 g/kg  
Total:.....1 kg

Ready-to-use fly bait granules for the control of adult houseflies in household and commercial areas.

Contains denatonium benzoate, an acutely bitter agent which reduces the possibility of accidental ingestion by children, domestic animals or wildlife.

Net Contents:

**250 g**

FDA registration No. HSR 8097

**DIRECTIONS FOR USE**

Restraint:

DO NOT place bait in areas accessible to food producing animals or pets.

SITUATION	PEST	RATE	CRITICAL COMMENTS
<b>Outside:</b> Around houses, commercial buildings, food processing plants and other industrial and commercial areas.  <b>Around:</b> Industrial sites, feedlot manure heaps, garbage dumps.	Adult house flies ( <i>Musca domestica</i> )	2 g/m <sup>2</sup>	<b>Scatter application:</b> The bait should be scattered (do not put in piles) onto dry level surfaces (e.g. pathways, window ledges or in shallow dishes. Avoid very dusty areas. <b>Bait Station application:</b> Set up Stations by sprinkling into shallow tins, lids or similar containers and place where flies congregate. Position Stations out of reach of animals or livestock and away from feed troughs, storage or mixing areas. <b>Wet Bait:</b> In many situations more flies can be attracted to moist bait. This can be achieved by sprinkling bait on moist hessian sacks (placed out of reach of all animals) or by lightly moistening bait with a light spray of water. <b>Paint-on application:</b> To prepare a paste for painting, mix 50 g of VECTOTHOR with 37.5 ml. of water. 15 minutes after mixing the paste can be applied with a brush to spots where flies rest (e.g. walls, joists, window ledges, stable fixtures). Additionally, it can be painted onto hessian bags or sheets of cardboard or fabric which are hung in areas frequented by flies. After use the brush can be cleaned with warm water. <b>Re-baiting:</b> Re-baiting may be necessary in 3-5 days depending on exposure, weather and population density.
		5 g/m <sup>2</sup>	<b>Spray-on application:</b> Mix 250 g of VECTOTHOR with 1 L of water and apply with a knapsack sprayer as a coarse spray to surfaces where flies land at a rate of 1 L per 50 m <sup>2</sup> . The attractants within VECTOTHOR will lure flies to the surface where they will attempt to feed thus, picking up a lethal dose. Due to this bait function, on portions of vertical surfaces need to be treated. For areas of 50 m <sup>2</sup> application of spray in bands covering about 1/3 of the total surface.
<b>Inside:</b> Commercial and industrial facilities and animal houses <b>ONLY</b> in areas inaccessible to livestock and domestic animals  <b>Under:</b> Animal and poultry cages <b>ONLY</b> in areas inaccessible to livestock.		2 g/m <sup>2</sup>	Apply as a scatter bait, in bait stations or as paint-on or spray-on application as above. Place out of reach of all animals and away from feed. Re-bait dry bait stations as above.

**GENERAL INSTRUCTIONS**

VECTOTHOR Fly Bait can be applied in many locations. Avoid cool or windy conditions (usually flies prefer warm sites for resting). For best results time application begins at the start of the season before fly populations have reached their peak.

Fly control should be considered part of an integrated strategy which incorporates good sanitation, appropriate management of breeding sites (e.g. manure and other decaying organic matter), and exclusion measures for preventing access of flies into internal areas.

NOTE: This product is not attractive to all species of flies and control of non-target species may require other means of control.

**PRECAUTIONS**

Do NOT allow contact with raw or processed food, utensils or packaging.

**PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT**  
 Do NOT place baits in locations accessible to domestic animals, livestock or birds. Do NOT contaminate streams, rivers or waterways with the chemical or used containers.

**PROTECTION OF PETS AND LIVESTOCK**

Before spraying remove animals and pets from the areas to be treated. Cover or remove any open food and water containers. Cover or remove (as applicable) fish ponds, aquariums etc. before spraying.

**STORAGE AND DISPOSAL**

Store in the dosed, original container in a dry, cool, well-ventilated area out of direct sunlight.

Triple rinse containers before disposal. Dispose of in compliance with relevant government regulations. Do not burn empty containers or product.

Treated sacks, cardboard or fabric may be re-used as necessary. After use they should be disposed of by placing in a plastic bag and putting in the garbage.

**SAFETY DIRECTIONS**

Will irritate the eyes. Avoid contact with eyes. When using the product wear cotton overalls buttoned to the neck and wrist (or equivalent clothing), rubber gloves and goggles. If product in eyes wash it out immediately with water. Wash hands after use. After each day's use, wash gloves, goggles and contaminated clothing.

**FIRST AID**

If poisoning occurs, contact a doctor or National Poison Control and Information Service, c/o Philippine General Hospital  
 Emergency Tel Nos: 02-524-1078 / 02-521-8450 loc 2311

**SDS**

Additional information is listed in the Safety Data Sheet which is available from Enystex on request.

**NOTICE**

Enystex warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with Directions for Use under normal conditions of use. No warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of the product contrary to label instructions or under abnormal conditions.
